RESUME

Full-Stack Web Developer with 2+ years of professional experience and 3+ years of self-directed learning and project development. Experienced in building and maintaining web applications across both frontend and backend, with a growing focus on mobile development. Started my career as a freelancer and am now seeking a challenging opportunity where I can contribute my technical skills while continuing to grow professionally and take on greater responsibilities.

EXPERIENCE

Full stack Developer

March 2024 - June 2024

LeeUP

Remote

- * Built a fully responsive blog platform from design specifications, implementing a headless CMS architecture and API integrations for dynamic content management.
- * Enabled non-technical users to independently manage blog content and media through an intuitive CMS interface.
- * Implemented SEO best practices and analytics tracking to improve search visibility and monitor platform performance.

Full stack Developer

June 2024 - July 2024

CIFUP

Remote

- * Translated UI/UX designs and mockups into a responsive, production-ready blog platform.
- * Configured a headless CMS architecture and API integrations to enable dynamic content delivery and independent content management.
- * Implemented SEO optimization and analytics/metrics tracking to support search visibility and performance monitoring.

Front end Developer

July 2024 - October 2025

Paazaa

Remote

- * Led frontend development and UI implementation for a complex web application, translating complete product designs into production-ready interfaces.
- * Designed and maintained frontend-backend integrations, authentication and authorization flows, and role-based access control.
- * Integrated GrapesJS to build and extend a drag-and-drop website builder, alongside EJS for dynamic content rendering and TanStack Query for server-state management and data fetching.
- * Established reusable UI components and design patterns to maintain consistency and improve development efficiency.
- * Contributed to user experience improvements and implemented modern frontend development practices across the application.

Full stack Developer

October 2025 - November 2025

MKTGDirectory

Remote

- * Developed full-stack features including OAuth authentication, user management systems, subscription-based payments with Stripe, and token-based access to platform services.
- * Integrated social media APIs including Facebook, Twitter, and LinkedIn across backend and frontend architectures.
- * Designed and managed job queues, scheduled tasks, and application deployment processes.
- * Integrated modern AI APIs into application workflows and designed user interfaces for AI-powered features.
- * Contributed across the frontend and backend, delivering complete features from API implementation to production-ready interfaces.

Full stack Developer

November 2025 - December 2025

OnepgApp

Remote

- * Developed core application features including user management, database integrations, API endpoints, and automated application testing.
- * Contributed to the development and maintenance of an in-app website builder, implementing template management, styling options, forms, and related functionality.
- * Investigated and resolved application issues while maintaining and improving existing features.

* Developed frontend interfaces and backend endpoints to support new product requirements and platform functionality.

Full stack Developer
Promptha

December 2025 - January 2026
Remote

- * Implemented fixes and completed pending integrations between frontend and backend systems, ensuring reliable communication across application layers.
- * Managed and optimized database models by modifying schemas and relationships to support evolving application requirements.
- * Completed the integration of Stripe payment processing and implemented additional features based on project requirements.
- * Investigated and resolved technical issues across the application while contributing to ongoing development and maintenance.

Full stack Developer
QuickflipAI

February 2026 - June 2026
Remote

- * Contributed to the development of an AI-powered reselling platform, working across frontend, backend, database, and AI integrations.
- * Implemented core features including user authentication, database management, backend architecture, and AI API integrations for property analysis and recommendations.
- * Developed responsive frontend interfaces focused on delivering a seamless user experience across different devices.
- * Collaborated with the development team to optimize application performance and implement new features based on user feedback.
- * Contributed to the successful launch of the platform in early 2026, which is currently active and in production.

EDUCATION

Instituto Privado de Merlo
High school degree
